Subject: Gold King Mine spill drinking water results notifications to well users
Start Date/Time: Sat 8/22/2015 6:00:00 PM
End Date/Time: Sat 8/22/2015 7:00:00 PM

This is not an agenda, but here is some perspective:

Status:

~300 sampling requests incident to date, 20 requests Friday, 4 so far Saturday morning
142 samples collected to date, 32 collected Friday, target 50 today (right Joyel?)
61 results rec'd to date, Wendy can discuss exceedances. Note there were a couple SECONDARY MCL exceedances from the first analyses batches IN ADDITION to Wendy's email about exceedances yesterday.
~30 additional raw lab results expected today, tomorrow . . . 2 day lag from sample collection to receipt of raw lab data.
